Summary

Frontend Developer focused on building clean, responsive, and user-centric web interfaces. With a strong analytical foundation and a business-oriented perspective from a diverse academic background, I bring structured problem-solving and attention to detail into every project. Driven to create scalable, high-quality frontend solutions that enhance user experience and product value.

Projects

Luxro Car Rental

🐙 [GitHub Link](#)

Angular Indian Car Renting Application

- Built a responsive **car rental application** using Angular 21, TypeScript, HTML, and CSS, implementing features including dynamic listings, filtering, authentication flow, favorites, and booking confirmation, improving user interaction coverage across core rental workflows.
- Designed a modular, component-based architecture with Angular routing and lazy loading to reduce initial load time by 35% and deployed the optimized production build on Netlify with client-side routing for seamless SPA navigation and performance reliability.
- **Tools Used:** Angular, TypeScript, HTML, Git, Github and Tailwind CSS.

RecipyRealm

🐙 [GitHub Link](#)

Angular Recipe Management Application

- Developed **RecipyRealm**, a responsive recipe management SPA using Angular, TypeScript, and lazy-loaded routes, enabling users to browse categorized recipes, view step-by-step instructions, and manage shopping lists with optimized UI performance.
- Implemented Angular routing, component communication, and modular architecture, improving application scalability and navigation efficiency, and deployed the production build on Netlify with SPA routing configuration to ensure seamless client-side navigation and high availability.
- **Tools Used:** Angular, TypeScript, HTML, Git, Github and Bootstrap.

BookBuddy

🐙 [GitHub Link](#)

Book Discovery Web Application

- Developed **BookBuddy**, a lightweight and responsive book discovery web application using HTML, CSS, and vanilla JavaScript, enabling users to browse book collections and view detailed information with optimized load performance and intuitive UI design.
- Implemented efficient DOM manipulation, responsive layout techniques, and modular UI structuring, improving rendering performance and cross-device usability while maintaining a framework-free, maintainable frontend architecture.
- **Tools Used:** JavaScript, HTML, Git, Github and CSS.

Education

- Gojan School of Business and Technology**, MBA HR and Operations Management Aug 2022 – Sep 2024
- GPA: 8.3/10
- Velammal Engineering College**, B.E Mechanical Engineering Aug 2017 – Jul 2021
- GPA: 8.2/10

Skills & Technologies

Frontend Development: HTML, CSS, JavaScript (ES6+), TypeScript, Angular

UI Frameworks & Styling: Tailwind CSS, Bootstrap

Version Control & Collaboration: Git, GitHub

Web Concepts: REST API Integration, Single Page Application (SPA) Development, Firebase Authentication.

Professional & HR Skills: Requirement Analysis, Team Collaboration, Process Improvement, Problem Solving

Experience

- Quality Assurance Associate**, Amazon – Chennai. Nov 2021 – May 2022
- Maintained strong attention to detail when proofing all materials.
 - Compared each task against specifications outlined in SOPs.
 - Performed quick, visual reviews of print book files based on specifications and training provided.
 - Performed tasks using fair judgment by understanding instructions provided by the Subject Matter Experts, managers, or SOPs.

Academic Projects (Engineering & MBA)

- FEA Analysis of Ceramic-Coated Brake Discs (Mechanical Engineering)** Jan 2021 - May 2021
- Analyzed structural and thermal stress behavior using ANSYS and validated results with experimental hardness, corrosion, and micro-structural testing.
- Design and Fabrication of Gear Test Rig (Mechanical Engineering)** Nov 2020 - Jan 2021
- Designed and built a gear testing mechanism to evaluate wear, corrosion, and fatigue performance under controlled operating conditions.
- Impact of Teamwork on Organizational Productivity (MBA – HR)** Aug 2023 - Sep 2023
- Studied team structures and performance factors using qualitative and quantitative methods to recommend strategies for improving collaboration and productivity.
- Study on Quality Management (MBA – Operations)** Mar 2024 - Jun 2024
- Evaluated quality management frameworks and process improvement practices to enhance customer satisfaction and regulatory compliance.
